

DIRECTOR OF INFORMATION & TECHNOLOGY SERVICES (ITS)

Tuan has over 13 years in experience across the energy regulation, mobile telephony, and electronic engineering industries. He is experienced in software development, network administration and systems support.

Prior to joining Elenchus, Tuan had successfully started and operated an IT support and management company, servicing and supporting small to medium-sized companies in and around the GTA.

Since joining Elenchus, Tuan has been involved in the LDC EDR rate application processes, as well as being responsible for management and development of Elenchus branded services, sites and systems. He successfully developed and implemented Elenchus Insights, a service which provides analysis and delivery of Elenchus's interpretations of industry news and information. He is also responsible for managing all aspects of Elenchus's IT solutions and services, as well as managing their projects.

Tuan has also been involved in post LDC EDR application processes such as responses to intervenors' and regulators' arguments.

Tuan graduated from Brunel University in London, UK with a Bachelor of Engineering with Honours degree.

PROFESSIONAL OVERVIEW

ELENCHUS

2007 - Present

Director of Information & Technology Services (ITS)

Responsible for:

- Managing all Elenchus projects, both internal and client-specific.
- Development and management of internal systems and network infrastructure, as well as providing consultants with assistance to regulatory consultation tasks and projects.
- Developed, implemented and managed Elenchus Insights, a service that utilizes Elenchus's industry expertise to deliver detailed and constructive information on the energy industry's news and decisions.
- Conduct analysis summaries of industry news and information, which form part of the Elenchus Insights service.
- Developed, implemented and managed ERA WebComm, a web-based application that allows for remote meetings with audio and visual capabilities. This application is used as the delivery method for Elenchus Insights.
- Responsible for management and integrity of all Elenchus branded applications, systems, sites and networks.
- Assisted in production phase of 2009 EDR applications for multiple LDCs.

- Assisted in post EDR application processes such as responses to interrogatory and intervenor arguments.
- Implementation of multiple tools and services to enhance productivity and efficiency internally.
- Management and development of website development for Elenchus and its associated branches (CERISE and Econalysis).
